MIGRATE YOUR DATA LIKE NO OTHER PROVIDER CAN

eso

Enjoy unmatched efficiency, accuracy, and security for your Emergency Reporting data migration process.

Simplest Migration in the Market
Our proprietary data migration tooling is the first and only of its kind that seamlessly migrates your data into ESO Fire RMS with little to no lift on your teams.

Unmatched Data Experience
Once upgraded, your organization can start leveraging current and historic data in the cloud-based, end-to-end experience. Export, view, and use your historical data like you've never been able to before.

Maximized Data Transfer
No one can transfer your data out of Emergency Reporting like ESO can. Reference the field and attachment list below to start planning your migration.

Admin
- ☐ Units
- ☐ Vehicles
- ☐ *Personnel
- ☐ Ranks
- ☐ Stations
- ☐ Shifts

- ☐ Inspection Contacts
- ☐ Inspection Violations, Remarks & Observations with Attachments
- ☐ Inspection Notes

Historical Incidents
Includes drawings, pictures, and notes.
- ☐ Incidents (NFIRS + Additional Fields)
- ☐ Incidents Attachments

Hydrants
While there is no direct data migration, we can extract your data from ER and import it into ESO through the user-friendly spreadsheets available within the hydrant module.

Inventory / Maintenance
Similar to Hydrants, there is no data migration. However, it's possible to extract the data from ER and import it via the spreadsheets available within ESO.

Attachments can be transferred as either a JPG or PDF. There might be some attachments that will not be automatically brought over into ESO and may require manual attention.

Persons information does not include Classes or Fire Certifications.

***Additional NEMSIS demographics data required for state reporting.*

Please note: If you started using ESO before January 1, 2023, please contact **success@eso.com**.
