# ELECTRONIC HEALTH RECORD

**eso**

**ESO Electronic Health Record (EHR)** is designed to work off the shelf and adapt to meet the evolving needs of our communities–before, during, and after the call.

ESO's EHR patient-centric technology supports the realities of EMS with simple workflows, quality documentation, and meaningful data, so you can stay focused on your job, not paperwork. Built for today, built to stay.

**Made for:**

**EMS**

**FIRE**

---

### BUILT BY FIRST RESPONDERS WITH SIMPLICITY IN MIND

ESO EHR works intuitively with your workflows, whether documenting patient care on a computer, tablet, or mobile device, reviewing reports, or syncing records from the field.

### ACTIONABLE DATA AT YOUR FINGERTIPS

Access built-in tools like ESO Insights, ESO Quality Management, State Reporting, and ESO HDE Patient Outcomes from hospitals to generate reports, track key metrics, and see the bigger picture of your agency's performance.

### DIRECT CAD INTEGRATION FOR IMPROVED EFFICIENCY

Reduce manual entry and help keep your data accurate with computer-aided dispatch (CAD) technology by pulling dispatch information directly into your records.

### STAY PREPARED WITH CRITICAL CARE WORKFLOWS

Designed to be used anywhere with real-time access to patient data, ESO's Critical Care workflows are optimized for the instant input and retrieval of data to speed up documentation for critical patient situations, including flight and neonates.

### AUTOMATED DATA PROCESSING

Never again worry about losing data or delaying payments–ESO handles the interfaces with billing and states. If you're out of internet range or working offline, your data will automatically sync when you are back online.

### SOFTWARE THAT'S ALWAYS UP TO DATE

We're constantly innovating and improving our technology. Get the latest features from ESO EHR automatically with no manual updates, just the latest tools when you need them.

### COMPLIANT WITH YOUR STATE'S REQUIREMENTS

ESO EHR is fully compliant with NEMSIS Version 3.5, NERIS, and all state-level requirements, so no more worrying about compliance.

### BETTER DECISIONS, BACKED BY DATA

ESO EHR is more than a documentation tool–it's packed with reference information and treatment guides that help you make better patient-care decisions in real time.
