

eso ELECTRONIC HEALTH RECORD

The responsibilities of first responders start long before the call and continue on after, so you're going to need an ePCR that supports your team on and off the scene.

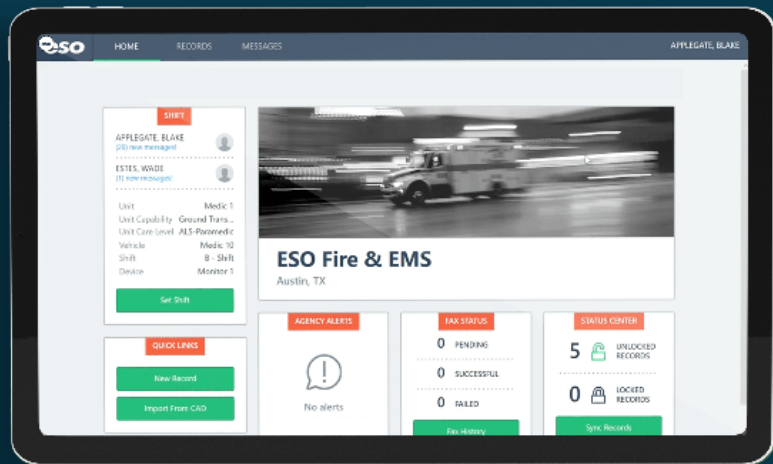

ESO Electronic Health Record (EHR) is designed to incorporate seamlessly into your current workflows while continuing to adapt to the evolving needs of your community. Built for providers to put the patient first, ESO EHR streamlines paperwork while improving record keeping, so you can document more impactful insights while keeping your focus on care.

Now with increased interoperability, enhanced Mobile Integrated Health (MIH) and Critical Care support, iOS capabilities, and more, it has everything your team needs to stay ahead of the industry's demands.

Made for:

EMS

FIRE

How can ESO EHR help your team?

DOCUMENT CARE ON A COMPUTER, TABLET, OR MOBILE DEVICE

ESO EHR is compatible across all systems – including iOS – so you can access data, review reports, or sync records in real time from the field no matter what device you're using.

TREAT PATIENTS IN THE COMFORT OF HOME

Mobile Integrated Health (Community Paramedicine) workflows allow your team to better support the non-emergent calls within your community.

STREAMLINE WORKFLOWS WITH DIRECT CONNECTIVITY

Connected to computer-aided dispatch (CAD), Billing, and Pre-hospital systems, ESO EHR reduces duplicative entry, and provides real-time insights based on the full patient picture.

PROVIDE BETTER OVERALL CRITICAL CARE

Optimized for the instant input and retrieval of data, ESO EHR's Critical Care workflows speed up documentation in critical situations, such as flights and neonates.

EXPEDITE YOUR RESPONSE

Predictive resource allocation allows you to get your team on-scene faster when every second counts.

KEEP FOCUS ON THE PATIENT

A more patient centric view allows you to view past encounters, medications, and history, as well as access helpful treatment guides that better facilitate care in real time.

CUSTOMIZE TO YOUR NEEDS

New customization features and upcoming AI enhancements allow you to tailor care even more to your community needs.

STAY UP TO DATE AND COMPLIANT

Constantly innovating and improving to keep up with industry trends, ESO EHR also helps you maintain compliance with NEMSIS Version 3.5, NERIS, and all state requirements.
